ENERGY SOLUTIONS FOR INDUSTRY

ENERGY SOLUTIONS

Climate neutrality and the efficient use of energy are key requirements for industry. Therefore it needs energy-saving and low-emission solutions in order to operate climate-neutral plants and to reduce emissions sustainably.

The Energy Solutions Community shows integrable energy solutions from the construction of the infrastructure to the practical implementation in the production process

FOCUS POINTS

CLIMATE NEUTRALITY IN INDUSTRY

- The CO2 neutral factory - ways to reconcile economy and sustainability
- Energy management - with a systematic approach for more efficiency and emission reduction

INFRASTRUCTURE

- Hydrogen - industrial engine of the future
- EMobility - quarters and fleets
- Energy networks - stability, availability and security

ENERGY AS PART OF THE PRODUCTION PROCESS

- Energy data management / energy automation – easy access to digitization
- Increasing energy efficiency - reducing costs
- Hydrogen in production - replacement of fossil fuels in energy-intensive industries

SUPPORTING PROGRAMME

- Integrated Energy Forum
- Hydrogen + Fuel Cells EUROPE
- DIGITAL ENERGY Joint pavillion & Forum

Das alles finden sie auf der HANNOVER MESSE - der Heimat industrieller Energielösungen.

Above all there is a holistic demand: How can the interaction of different technologies in one system contribute to climate neutrality?

You can find all of this at HANNOVER MESSE - the home of industrial energy solutions.
